ABBREVIATIONS

FY	Fiscal Year
GPD	gallons per day
IEPA	Illinois Environmental Protection Agency
MG	Million gallon
MGD	Million gallons per day
NPDES	National Pollutant Discharge Elimination System
PWSLP	Public Water Supply Loan Program
SRF	State Revolving Funds
WPCLP	Water Pollution Control Loan Program
WWTP	Wastewater treatment plant

1. EXECUTIVE SUMMARY

Donohue & Associates, Inc. was retained by the Village of Tolono to perform an engineering study to determine required capital improvements and corresponding rates for water and sewer service charges. This report is primarily intended to analyze the Village of Tolono's water and sewer system rates, rate structure, and rate adjustments necessary to fund anticipated capital improvement over the next 20 years.

Donohue worked with the Village to identify infrastructure, equipment, and processes that are depreciated, nearing the end of their useful life, or underperforming that will need replacement soon. The identified improvements were then prioritized and planning-level costs estimates were assigned to each one. Although there are not major capacity concerns within the existing collection system, the WWTP improvement alternatives were developed with the understanding that the plant is normally operating beyond its rated design capacity and that there are significant existing/proposed developments that have a desire to connect to the Village's system.

Donohue reviewed the budgets and audited financials of the Village. Based on the existing financial information and projected capital improvement needs, revenues and expenses were forecasted for the Village's water and sewer budgets over the next 20 years, fiscal years 2021 through 2040.

The Village's only outstanding debt related to the water or sewer system at this time is their water meter replacement project which was financed over a 7 year term. The meter replacements began in 2019 and are planned to be completed by the end of 2020. The loan for this work is schedule to be paid in annual payments of \$64,100.43 from 2021 through 2027.

All of the aforementioned data and analysis was used to develop two alternate capital improvement plans based on how the Village would like to finance capital improvement projects.

Based on the analysis in this report, if the Village plans to continue to operate and maintain both the water and sewer system in good condition, we would recommend pursuing low-interest IEPA, long-term financing for water and sewer capital improvement projects. There is potential for principal forgiveness (similar to grant funds) for both water and sewer improvements with this funding source. A summary of anticipated adjustments to the water and sewer rates over the next 20 years to proactively perform proper maintenance and capital improvements is as follows:

Water:	FY 2021 – 2023	10% increase
	FY 2024 – 2040	Cost-of-living-adjustment (assumed to be 3%)
Sewer:	FY 2021 – 2024	10% increase
	FY 2025 – 2035	5% increase
	FY 2036 – 2040	Cost-of-living-adjustment (assumed to be 3%)

2. BACKGROUND INFORMATION

2.1 WATER SYSTEM

The Village purchases bulk water from Illinois American Water Company who owns operates, and maintains the existing ground storage tank located on Holden Street, between Borne & Calhoun. The Village owns, operates, and maintains the water distribution system throughout the Village, from the connection point to the ground storage tank, including all of the mains, valves, hydrants, services from the main to the meter pit, and the meter pits. Water distribution system additions since the original construction include various main improvements in the 1970's along with main extensions to serve Linshar Fields subdivision in the 1990's and the Deerpath, Windstone, Kinderwood, and Southview subdivisions in the 2000's. The Village has just recently begun replacing existing water meters throughout the Village to allow for improved metering/billing and remote read capability.

2.2 SEWER SYSTEM

The Village's sewer collection system is comprised of approximately 80,100 feet of gravity sanitary sewer and six (6) municipal lift stations (not including the WWTP influent lift station) and force mains. The majority of the collection system and WWTP were built with the original system constructed in the early 1970's. Collection system additions since the original construction include the extension to serve the Linshar Fields subdivision in the 1990's and the Deerpath, Windstone, Kinderwood, and Southview subdivisions in the 2000's. Aside from the subdivision additions, the only notable collection system improvements the Village has made since 2000 was the installation of the East Side Interceptor. The WWTP is an activated sludge WWTP that has had some upgrades including the construction of a primary clarifier, filter building, sludge storage lagoon in the 1980's and the addition of a roughing filter in 2011. The Village owns, operates, and maintains the gravity sewers and contracts ERH Enterprises to operate and maintain their WWTP and Lift Stations.

3. EXISTING FINANCIAL INFORMATION

Historical budget and actual revenue and expenditure information was obtained from the Village to determine historical trends for expenses and revenues for the Water and Sewer Funds. This information was used to project annual operating and maintenance expenses in these areas.

The period reviewed included:

- Actual revenues and expenses from FY 2015-2016 (Referred to as 2016)
- Actual revenues and expenses from FY 2016-2017 (Referred to as 2017)
- Actual revenues and expenses from FY 2017-2018 (Referred to as 2018)
- Actual revenues and expenses from FY 2018-2019 (Referred to as 2019)
- Budgeted revenues and expenses for FY 2019-2020 (Referred to as 2020)

This information was provided by the Village. A copy of this information is included in [Appendix A](#).

Based on information provided by the Village's Clerk, as of April 30th, 2019 (end of FY 2019) the Village had an ending balance of \$1,458,338 in their sub-account for water/sewer. We have identified this amount as the Village's current reserve funds for water and sewer improvements. The Village does not have a sub-account for each utility so we elected to split these reserve funds as follows:

Water	20%	\$291,667.60
Sewer	80%	\$1,166,670.40

This split was decided based on identified capital projects and associated costs discussed later in the report for each utility. The Village's sewer system has more costly capital projects and less revenue to support them at this point.

3.1 WATER FUND REVENUES, EXPENSES, AND RATE STRUCTURE

The water fund revenues and expenses during the period from 2016-2020 were combined into 5 categories for simplification. Summaries of annual revenues and expenses over the time period are shown in the following tables:

WATER FUND REVENUES					
SOURCE	2016	2017	2018	2019	2020
Service Charges	\$410,857	\$418,052	\$497,820	\$513,551	\$540,850
Connection Fees	\$2,250	\$1,800	\$2,275	\$450	\$0
Fines & Forfeit	\$0	\$0	\$0	\$0	\$0
Other Revenue	\$2,805	\$2,655	\$4,003	\$4,314	\$5,000
Total	\$415,912	\$422,507	\$504,098	\$518,315	\$545,850

WATER FUND EXPENSES					
SOURCE	2016	2017	2018	2019	2020
Water Purchase	\$313,171	\$325,295	\$377,195	\$351,683	\$425,000
Personnel	\$69,069	\$100,260	\$105,592	\$49,271	\$84,264
O & M	\$10,551	\$12,980	\$11,226	\$19,172	\$23,700
Professional Services	\$2,200	\$13,102	\$1,937	\$27,513	\$12,750
Existing Capital Improvements	\$40,492	\$26,072	\$25,945	\$141,183	\$33,100
Other Expenses	\$49,105	\$49,525	\$41,956	\$18,412	\$28,200
Total	\$484,588	\$527,234	\$563,851	\$607,234	\$618,014

WATER FUND NET INCOME					
PROFIT/LOSS	2016	2017	2018	2019	2020
INCOME (LOSS)	(68,676)	(\$104,728)	(\$59,754)	(\$88,920)	(\$90,664)

Charges for services are the revenue that the Village receives from the payment of water bills. These charges include both fixed fees and volume fees as discussed further below. Normal monthly water usage rates over the last five years are depicted below.

MONTHLY WATER USER RATES					
COMPONENT	2016	2017	2018	2019	2020
Fixed Fee for First 2,000 Gallons	\$11.41	\$11.41	\$13.69	\$14.37	\$16.87
Volume Fee per 1,000 Gallons After	\$5.70	\$5.70	\$6.84	\$7.18	\$7.18

3.2 SEWER FUND REVENUES, RATES, & EXPENSES

The sewer fund revenues and expenses during the period from 2016-20120 were combined into 5 categories for simplification. Summaries of annual revenues and expenses over the time period are shown in the following tables:

SEWER FUND REVENUES					
SOURCE	2016	2017	2018	2019	2020
Service Charges	\$298,741	\$304,882	\$354,698	\$371,808	\$418,850
Connection Fees	\$2,250	\$1,800	\$2,275	\$450	-
Fines & Forfeit	-	-	-	-	-
Other Revenue	-	\$518	\$125	\$294	-
Total	\$300,991	\$307,200	\$357,098	\$372,552	\$418,850

SEWER FUND EXPENSES					
SOURCE	2016	2017	2018	2019	2020

O & M	\$69,206	\$70,555	\$5,627	\$61,673	\$87,400
Professional Services	\$4,514	\$4,948	\$6,366	\$32,630	\$103,750
Existing Capital Projects	\$138,461	\$161,886	\$143,850	\$173,951	\$250,000
Other Expenses	\$81,871	\$85,397	\$82,913	\$21,207	\$27,300
Total	\$370,890	\$441,498	\$402,425	\$376,681	\$586,097

SEWER FUND NET INCOME					
PROFIT/LOSS	2016	2017	2018	2019	2020
Net Income	(\$69,899)	(\$134,298)	(\$45,327)	(\$4,129)	(\$167,247)

Charges for services are the revenue that the Village receives from the payment of sewer bills. These charges include both fixed fees and volume fees as discussed further below. Normal monthly sewer usage rates over the last five years are depicted below.

MONTHLY SEWER USER RATES					
COMPONENT	2016	2017	2018	2019	2020
Fixed Fee for First 2,000 Gallons	\$8.30	\$8.30	\$9.96	\$10.46	\$13.48
Volume Fee per 1,000 Gallons After	\$3.30	\$3.30	\$3.96	\$4.16	\$4.37

4. CAPITAL PROJECTS, PRIORTIZATION, AND PLANNING COSTS

4.1 WATER SYSTEM

Future capital improvement needs have been identified through discussion with the Village's public works director. The following table identifies water system improvements needed and their corresponding priority, estimated time frame, and preliminary probable cost.

PRIORITY	PROJECT DESCRIPTION	ESTIMATED TIME FRAME	PRELIMINARY PROBABLE COST
1	Broadway & Reynolds Water Main Replacement	Immediate	\$250,000
2	Vorcey-Leda-Clifford-Borne Streets Water Main Replacement	1-5 years	\$250,000
3	Meadow Lane Water Main Looping	1-5 years	\$150,000
4	Miscellaneous Hydrant & Valve Replacement	1-15 years	\$200,000
5	Distribution System Future Main Renewal	Bi-Annually (Beginning 2030)	\$230,000

Priorities and estimated time frames were established based on condition assessments and input from the Village's Public Works Director.

Broadway & Reynolds Water Main Replacement project has been designed and permitted and is awaiting funds to construct.

The Vorcey-Leda-Clifford-Borne Streets Water Main Replacement project was identified to replace undersized mains that have experienced frequent breaks recently.

The Meadow Lane Water Main Looping project would provide improved water quality for the area by looping the main that feeds Unity South Elementary and miscellaneous commercial/residential properties in the area with the main that feeds The Oaks Mobile Home Park. Every summer there are reports of low chlorine residual and water quality complaints at the Oak Mobile Home Park when the school is on break.

Specific hydrant/valve replacement locations have yet to be identified but based on discussions with the Public Works director, we have budgeted for up to 40 locations for valve and/or hydrant replacements.

It is very likely that there will be additional main replacement needs in the future that have not been identified yet since a significant portion of distribution system was constructed more than 50 years ago. In order to prepare for this, we assume the Village should budget \$230,000 bi-annually beginning in fiscal year 2030.

4.2 SEWER SYSTEM

Future capital improvement needs have been identified through a series of engineering studies performed by Donohue over the past couple years. The following table identifies sewer system improvements needed and their corresponding priority, estimated time frame, and preliminary probable cost.

PRIORITY	PROJECT DESCRIPTION	ESTIMATED TIME FRAME	PRELIMINARY PROBABLE COST
1	WWTP Improvements	1-3 years	\$5,600,000
2	Southside Sewer Extension	1-3 years	\$1,658,000
3	Elizabeth St. Lift Station	3-5 years	\$100,000 - \$300,000
4	Watson St. Lift Station	5-10 years	\$100,000 - \$300,000
5	Collection System Future Sewer & Lift Station Renewal	Bi-Annually (Beginning 2029)	\$408,000

Priorities and estimated time frames were established based on condition assessments and input from the Village's Public Works Director.

The East St. Lift Station Replacement project is in the design/permitting phase now and planned to be constructed in 2020 so for now it has been excluded from future capital improvement projects.

Ideally, the WWTP improvements would be completed before, or in concurrence with, extending service to additional users.

The Southside Sewer Extension is proposed to serve The Oaks mobile home park, Unity West Elementary School, a couple small commercial properties, and 17 residential properties. The Oaks is the largest existing user in this area and have expressed interest to expand the existing park if they can abandon their septic system and connect to the Village's system.

Both the WWTP Improvements and the Southside Sewer Extension would likely require financing but the sewer extension could possibly be funded through a special service area surcharge to split the capital costs amongst the new users from the service area.

The Elizabeth St. Lift Station and the Watson St. Lift Station are both can-type stations which require personnel to perform confined space entry for operation and maintenance. Elizabeth St. has been noted to have some clogging issues as well. These are both good candidates for rehabilitation or replacement to resolve clogging issues and alleviate the need for personnel confined space entry.

It is very likely that there will be additional collection system capital improvement needs in the future that have not been identified yet since the majority of the sewer system was constructed more than 50 years ago. In order to prepare for this, we assume the Village should budget \$408,000 bi-annually beginning in Fiscal Year 2029. This does not account for future WWTP rehabilitation or replacement.

Although it is not included in the above chart as a capital project, IEPA recommends communities clean and inspect 20% of their gravity sewers annually but realize that some communities struggle to complete this due to financial constraints. A reasonable goal would be to complete 10% annually so that all sewers are being cleaned/inspected every 10 years. This has not been performed in the past, nor accounted for in the annual sewer budget. An initial annual allocation of \$28,000 (proportionally increased annually with cost-of-living adjustments) is recommended and should allow the Village to meet the goal of inspecting 10% of their collection system annually.

5. CAPITAL IMPROVEMENT SEQUENCING ALTERNATIVE

Two capital improvement plan alternatives were developed based on estimated time frame in which improvement projects are needed.

5.1 ALTERNATE 1 – PAY-AS-YOU-GO

In the pay-as-you-go alternative it was assumed that capital projects will be performed as funds become available and will be paid for using cash reserves from the water and sewer funds instead of procuring loans or bonds.

For this alternate, capital projects were assigned a year based on priority in an attempt to spread costs out evenly and minimize major rate increases. Annual increases in service charges were adjusted in order to keep the sewer and water fund account balances positive. Due to the significant project costs related to the sewer system, this alternative would require significant annual rate increases as well as postponing improvements beyond the existing system components' anticipated useful lives.

The result of this analysis for the water and sewer utilities, respectively, are shown in **Tables 5.1 and 5.2.**

5.2 ALTERNATE 2 – LONG-TERM FINANCING

In the long-term financing alternative it was assumed that capital projects will all be designed and constructed in consecutive years. Design costs would be paid by the Village and would be eligible for reimbursement through the loan, if desired. The long-term financing alternative was developed based on current IEPA terms for the Public Water Supply Loan Program (PWSLP) and Water Pollution Control Loan Program (WPCLP). Currently, the Village of Tolono is eligible for financing based on IEPA's small community rate. The current terms for water and sewer improvements are as follows:

Water: Up to 30 years at approximately 1.515% (75% of market rate at time of loan closing)

**Eligible for 60% Principal Forgiveness (\$800,000 maximum)*

Sewer: Up to 30 years at approximately 1.515% (75% of market rate at time of loan closing)

**Eligible for 15% Principal Forgiveness*

**Although the Village is currently eligible for principal forgiveness, it has not been accounted for in the capital improvement plan since the program is subject to change annually.*

Capital improvements related to the water system in this alternate are slated to be designed and constructed over the years of 2021 and 2022 and financed over a 20 year term.

Capital improvements related to the sewer system in this alternate are slated to be designed and constructed between the years of 2022 to 2024. There may be a desire to complete the Southside Sewer Extension sooner to accommodate additional development which may be feasible but would likely require some additional sampling at the WWTP to determine if it could adequately treat the additional flow prior to constructing the WWTP Improvements. Annual increases in service charges were adjusted in order to keep the sewer and water fund account balances positive.

The result of this analysis for the water and sewer utilities, respectively, are shown in **Tables 5.3 and 5.4.**

Broadway & Reynolds Water Main Replacement (Construction 2021)	\$250,000.00	\$257,500.00																							
Vorcey-Leda-Clifford-Borne Streets Water Main Replacement (Design/Construction 2023)	\$250,000.00			\$273,181.75																					
Meadow Lane Water Main Looping (Design/Construction 2025)	\$150,000.00					\$173,891.11																			
Miscellaneous Hydrant & Valve Replacement (Design/Construction 2027)	\$200,000.00							\$245,974.77																	
Water System Mapping Updates (2020)	\$11,000.00																								
³ Distribution System Future Water Main Renewal (~\$230k every other year beginning in 2030)														\$230,000.00		\$230,000.00		\$230,000.00		\$230,000.00		\$230,000.00		\$230,000.00	\$230,000.00

¹ Total number of users is likely to increase but estimates are based on number of users remaining the same

² 2020 Cost estimates will be inflated by 3% annually

³ Proposed Capital Projects include \$11,000 in 2020 for mapping if it is not completed with the proposed project plan for IEPA financing.

⁴ Total ending balance for Water/Sewer Fund as of 4/30/2019 was \$1,458,338. This value assumes 20% will be dedicated towards water system capital improvements and 80% will be dedicated towards sewer system capital improvements.

⁵ Annual renewal calculated assuming 50% of hydrants/valves will need replaced at 40 years and all distribution mains need replaced every 80 years which would include replacement of existing services and remaining hydrants/valves

SEWER FUND 52

¹ Total number of users is likely to increase but estimates are based on number of users remaining the same

² 2020 Cost estimates will be inflated by 3%

³ Proposed annual sanitary sewer inspection costs are included in projected Operation & Maintenance

⁴ Total ending balance for Water/Sewer Fund as of 4/30/2019 was \$1,458,338. This value assumes 20% will be dedicated towards water system capital improvements and 80% will be dedicated towards sewer system capital improvements.

⁵ Annual renewal calculated assuming pumps replaced every 10 years, lift station rehab at 20 years, and lift station replacement every 40 years, 50 year gravity sewer rehab(25%/replacement(25%), 100 year gravity sewer rehab(25%/replacement(25%), force main replacement every 80 years.

WATER FUND 51

⁵ Distribution System Future Water Main Renewal (-\$230k every other year beginning in 2030)														\$230,000.00		\$230,000.00		\$230,000.00		\$230,000.00		\$230,000.00		\$230,000.00		

¹ Total number of users is likely to increase but estimates are based on number of users remaining the same

² 2020 Cost estimates will be inflated by 3% annually

³ Proposed Capital Projects include \$29,500 in 2020 for completion of proposed project plan which includes system mapping for IEPA financing.

⁴ Total ending balance for Water/Sewer Fund as of 4/30/2019 was \$1,458,338. This value assumes 20% will be dedicated towards water system capital improvements and 80% will be dedicated towards sewer system capital improvements.

⁵ Financing assumes all proposed capital projects are constructed in 2022 and financed in accordance with current IEPA SRF terms 1.515% over 20 years (no principal forgiveness is included in these calculations)

⁶ Annual renewal calculated assuming 50% of hydrants/valves will need replaced at 40 years and all distribution mains need replaced every 80 years which would include replacement of existing services and remain hydrants/valves

SEWER FUND 52

¹ Total number of users is likely to increase but estimates are based on number of users remaining the same

² 2020 Cost estimates will be inflated by 3% annually

³ Proposed annual sanitary sewer inspection costs are included in projected Operation & Maintenance

⁴ Proposed Capital Projects include \$28,500 in 2020 for completion of proposed project plan for IEPA financing.

⁵ Total ending balance for Water/Sewer Fund as of 4/30/2019 was \$1,458,338. This value assumes 20% will be dedicated towards water system capital improvements and 80% will be dedicated towards sewer system capital improvements.

6. RATE ADJUSTMENT ALTERNATIVES

One question frequently posed during a rate study is “What are adjacent communities’ water and sewer rates?” Although adjacent communities may have some similarities in population and economics, their water and sewer systems may be vastly different. However, we did reach out to adjacent communities that we felt were somewhat comparable to Tolono for reference. See the chart below.

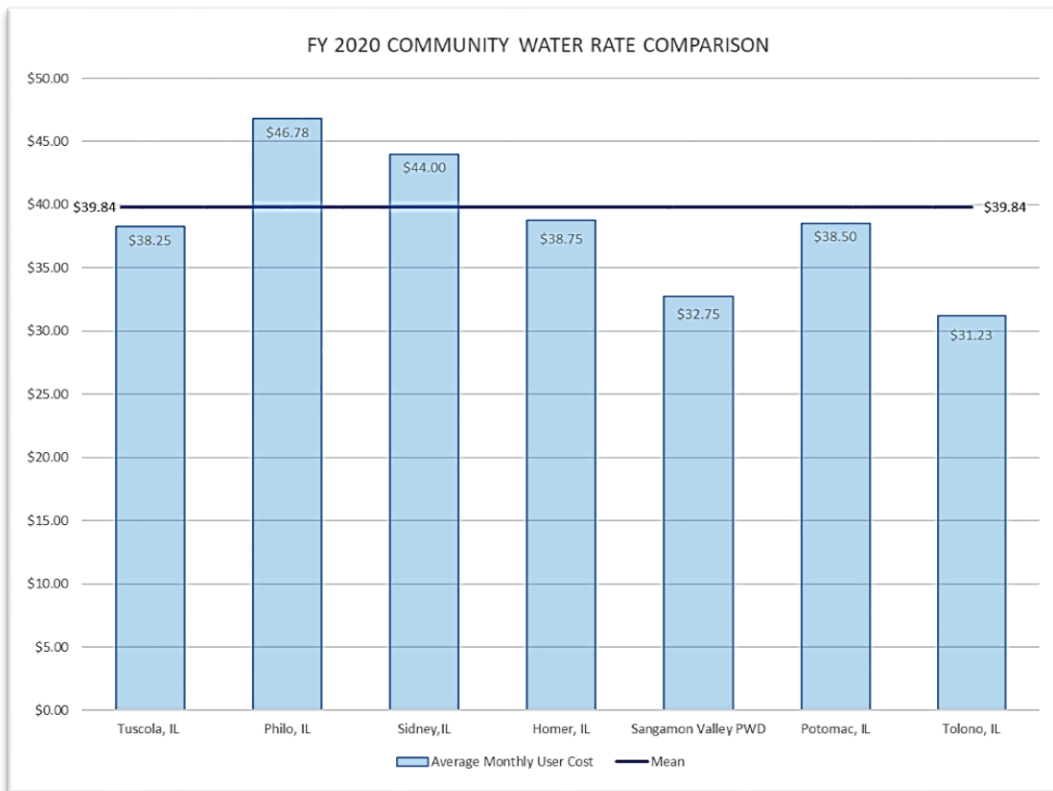

Current Community Water & Sewer Rates

Location	Water		Sewer		Water	Sewer
	Fixed Fee	Volume Charge	Fixed Fee	Volume Charge	User Rate at 4,000 Gallons/Month	User Rate at 4,000 Gallons/Month
Tuscola, IL	\$14.25/1,000 Gallons	\$8.00/additional 1,000 Gallons	\$7.25/1,000 Gallons	\$6.00/additional 1,000 Gallons	\$38.25	\$25.25
Philo, IL	\$16.50 Customer Charge	\$7.57/1,000 Gallons	No Sewer		\$46.78	\$0.00
Sidney, IL	\$22/First 2,000 Gallons	\$11/additional 1,000 Gallons	No Sewer		\$44.00	\$0.00
Homer, IL	\$17.50/1,500 Gallons	\$8.50/additional 1,000 Gallons	\$39.00/1,500 Gallons	\$7.00/additional 1,000 Gallons	\$38.75	\$56.50
Sangamon Valley PWD	\$19.55/2,000 Gallons	\$6.60/additional 1,000 Gallons	\$16.18/2,000 Gallons	\$6.60/additional 1,000 Gallons	\$32.75	\$29.38
Potomac, IL	\$28.50/2,000 Gallons	\$5.00/additional 1,000 Gallons	\$33.00/2,000 Gallons	\$5.00/additional 1,000 Gallons	\$38.50	\$43.00
Tolono, IL	\$16.87/2,000 Gallons	\$7.18/additional 1,000 Gallons	\$13.48/2,000 Gallons	\$4.37/additional 1,000 Gallons	\$31.23	\$22.22

NOTE: Rates do not account for special fees, taxes, surcharges that may be imposed by municipalities or private utility companies.

The mean average monthly user cost for water service in the adjacent communities listed above is \$39.84/month, approximately 28% higher than Tolono’s current average user rate. The mean average monthly user cost for sewer service in the adjacent communities listed above (with sewer service) is \$38.53/month, nearly 75% higher than Tolono’s current average user rate. This information is also displayed graphically on the following page.

Increases in both the water and sewer service charges are needed to maintain positive balances in the respective funds in all capital improvement sequencing alternatives as shown in Chapter 5. When projecting budgets 20 years into the future, it was assumed that all revenues, except for service charges, were negligible as is evident based on past financial information; over the past 5 years, service charges have comprised approximately 99% of water and sewer revenue. Service charge adjustments were developed for each capital improvement sequencing alternative to ensure a positive fund balance in all fiscal years. Although it is likely that water usage will increase as the number of users increase, rate adjustments were developed assuming that water usage and number of users remains constant to ensure the projections are conservative.

6.1 ALTERNATE 1 – PAY-AS-YOU-GO RATE ADJUSTMENTS

Based on the projections in Section 5.1, in order to maintain a positive balance in the water fund and complete improvements in a timely fashion, it would require a 25% increase in revenue in FY 2021, followed by an additional 10% increase in revenue in FY 2022, after which a standard cost-of-living adjustment could be applied annually (estimated at 3%).

In order to maintain a positive balance in the sewer fund while attempting to incrementally increase rates would require a 25% increase in revenue in each of fiscal years 2021-2026, followed by an additional 5% increase in revenue in fiscal years 2027-2030, after which a standard cost-of-living adjustment could be applied annually (estimated at 3%).

Table 6.1 on the following page simply applies the required revenue percentage increases across the board to the existing rate structure. It also shows the estimated impact to an assumed average user, consuming 4,000 gallons of water per month.

Water rate adjustments are reasonable in comparison to recent adjustments and it does not force identified improvement needs to a point that critical failure is a concern.

Sewer rate adjustments nearly quadruple an average user's monthly bill over the next 6 years. This alternative also forces identified high-priority improvements, like the WWTP Improvements and Southside Sewer Extension, further into the future increasing risks for critical failures and delaying anticipated development.

Tolono's proposed rate adjustments associated with this alternative over the next 20 years is compared to the current mean average monthly user costs for water and sewer service in adjacent communities (inflated with an assumed cost-of-living-adjustment of 3% annually) over the next 20 years. This comparison is graphically depicted following Table 6.1.

Table 6.1 - Pay-As-You-Go Rate Adjustments

Year	Water			Sewer			Water If Average User is 4,000 Gallons/Month	Sewer If Average User is 4,000 Gallons/Month	Combined If Average User is 4,000 Gallons/Month
	Fixed Fee	% Increase	Usage Fee	% Increase	Usage Fee	% Increase

2032	\$ 31,17	3%	\$ 13.27	3%	\$ 66.31	3%	\$ 57.71	\$ 109.30	\$ 167.01
2033	\$ 32,11	3%	\$ 13.67	3%	\$ 68.30	3%	\$ 59.44	\$ 112.58	\$ 172.02
2034	\$ 33,07	3%	\$ 14.08	3%	\$ 70.35	3%	\$ 61.22	\$ 115.96	\$ 177.18
2035	\$ 34,06	3%	\$ 14.50	3%	\$ 72.46	3%	\$ 63.06	\$ 119.44	\$ 182.50
2036	\$ 35,09	3%	\$ 14.93	3%	\$ 74.63	3%	\$ 64.95	\$ 123.02	\$ 187.98
2037	\$ 36,14	3%	\$ 15.38	3%	\$ 76.87	3%	\$ 66.90	\$ 126.71	\$ 193.61
2038	\$ 37,22	3%	\$ 15.84	3%	\$ 79.18	3%	\$ 68.91	\$ 130.51	\$ 199.42
2039	\$ 38,34	3%	\$ 16.32	3%	\$ 81.55	3%	\$ 70.98	\$ 134.43	\$ 205.41
2040	\$ 39,49	3%	\$ 16.81	3%	\$ 84.00	3%	\$ 73.10	\$ 138.46	\$ 211.57

As can be seen above, the Village’s proposed average monthly user cost for water service trends slightly higher than the mean average of the adjacent communities in the pay-as-you-go alternative. Ultimately, it trends about 2% above the mean average in 2040.

As can be seen above, the Village’s proposed average monthly user cost for sewer service trends much higher than the mean average of the adjacent communities in the pay-as-you-go alternative. Although rates could be reduced upon completion of some of the major capital improvement projects this would require public understanding and support that higher rates would be required in the years leading up to the improvements and belief that rate reduction would actually occur in the future.

6.2 ALTERNATE 2 – LONG-TERM FINANCING ADJUSTMENTS

Based on the projections in Section 5.2, in order to maintain a positive balance in the water fund and complete improvements in a timely fashion, it would require a 10% increase in revenue in each of fiscal year's 2021-2023, after which a standard cost-of-living adjustment could be applied annually (estimated at 3%).

In order to maintain a positive balance in the sewer fund, while attempting to incrementally increase rates, and complete improvements in a timely fashion, it would require a 10% increase in revenue in each of fiscal years 2021-2024, followed by an additional 5% increase in revenue in fiscal years 2025-2035, after which a standard cost-of-living adjustment could be applied annually (estimated at 3%).

Table 6.2 on the following page simply applies the required revenue percentage increases across the board to the existing rate structure. It also shows the estimated impact to an assumed average user, consuming 4,000 gallons of water per month.

Both water and sewer rate adjustments are reasonable in comparison to recent adjustments and it does not force identified improvement needs to a point that critical failure is a concern.

Tolono's proposed rate adjustments associated with this alternative over the next 20 years is compared to the current mean average monthly user costs for water and sewer service in adjacent communities (inflated with an assumed cost-of-living-adjustment of 3% annually) over the next 20 years. This comparison is graphically depicted following Table 6.2.

Table 6.2 - Long-Term Financing Rate Adjustments

Year	Water				Sewer				Water If Average User is 4,000 Gallons/Month	Sewer If Average User is 4,000 Gallons/Month	Combined If Average User is 4,000 Gallons/Month

2028	\$ 26,033	3%	\$ 11.08	3%	\$ 23.99	5%	\$ 7.78	5%	\$48.19	\$39.54	\$87.73
2029	\$ 26,811	3%	\$ 11.41	3%	\$ 25.19	5%	\$ 8.17	5%	\$49.63	\$41.52	\$91.15
2030	\$ 27,622	3%	\$ 11.75	3%	\$ 26.45	5%	\$ 8.57	5%	\$51.12	\$43.60	\$94.72
2031	\$ 28,444	3%	\$ 12.11	3%	\$ 27.77	5%	\$ 9.00	5%	\$52.66	\$45.78	\$98.43
2032	\$ 29,300	3%	\$ 12.47	3%	\$ 29.16	5%	\$ 9.45	5%	\$54.24	\$48.07	\$102.30
2033	\$ 30,188	3%	\$ 12.84	3%	\$ 30.62	5%	\$ 9.93	5%	\$55.86	\$50.47	\$106.33
2034	\$ 31,098	3%	\$ 13.23	3%	\$ 32.15	5%	\$ 10.42	5%	\$57.54	\$52.99	\$110.53
2035	\$ 32,011	3%	\$ 13.63	3%	\$ 33.76	5%	\$ 10.94	5%	\$59.26	\$55.64	\$114.91
2036	\$ 32,937	3%	\$ 14.03	3%	\$ 34.77	3%	\$ 11.27	3%	\$61.04	\$57.31	\$118.35
2037	\$ 33,966	3%	\$ 14.46	3%	\$ 35.81	3%	\$ 11.61	3%	\$62.87	\$59.03	\$121.90
2038	\$ 34,988	3%	\$ 14.89	3%	\$ 36.89	3%	\$ 11.96	3%	\$64.76	\$60.80	\$125.56
2039	\$ 36,033	3%	\$ 15.34	3%	\$ 37.99	3%	\$ 12.32	3%	\$66.70	\$62.62	\$129.33
2040	\$ 37,111	3%	\$ 15.80	3%	\$ 39.13	3%	\$ 12.69	3%	\$68.70	\$64.50	\$133.21

As can be seen above, the Village’s proposed average monthly user cost for water service trends slightly below the mean average of the adjacent communities in the long-term financing alternative. Ultimately, it trends about 5% below the mean average in year 2040.

As can be seen above, the Village’s proposed average monthly user cost for sewer service trends below the mean average of the adjacent communities in the long-term financing alternative. Ultimately, it trends about 7% below the mean average in year 2040.

7. RECOMMENDED CAPITAL IMPROVEMENT SEQUENCING & RATE ADJUSTMENTS

Based on the identified capital improvement needs, their respective priority, and alternatives for sequencing and financing the improvements, if the Village plans to continue to operate and maintain both the water and sewer system in good condition, we would recommend pursuing low-interest IEPA, long-term financing for water and sewer capital improvement projects. Benefits of financing these improvements include:

- 1) Gradual increases to water and sewer rates thus minimizing public scrutiny,
- 2) Potential for principal forgiveness (similar to grants)
- 3) Allows improvements to be completed in timely fashion to minimize risks for critical failures

IEPA requires capital improvement project plans to pursue funding through their PWSLP and WPCLP. Although terms of these programs are reviewed and adjusted annually, once a project plan is approved, it is valid for 5 years allowing any/all improvements within the approved project plan to be completed over that time frame in accordance with the terms of the program at the time improvements are being designed/constructed. The Village's current eligibility for these programs is discussed in Section 5.2 of this report. Should the Village decide to pursue capital improvement spending and rate adjustments as recommended, Donohue and Associates, Inc. has provided proposals to the Village to complete both a water system capital improvement project plan and a sewer system capital improvement project plan.
