

NOTICE

Hoerr Construction, Inc. will be performing sewer cleaning maintenance on the sanitary sewers in your neighborhood for your local municipality. We will be performing sewer cleaning in your area beginning on

for up to three (3) working days
(excluding Saturday and Sunday).

This cleaning is performed with a low pressure, high volume water jetting machine. Periodically, problems can be experienced where pressure in the sewer line forces water out of toilet traps in homes. **As a measure to keep this water contained and prevent any damage, we are asking residents to keep their toilets flushed, drape a towel over the rim and close the lid and seat onto the towel. Also cover basement floor drains.**

Thank you for your help.
